

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-28 (Canceled).

Claim 29 (Currently Amended): A film comprising, as sole layers,

(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier,  
and, ~~optionally~~,  
(2) at least one layer L2 comprising an aliphatic polyamide.

Claim 30 (Previously Presented): The film according to claim 29, wherein said aromatic polyamide is a polyphthalamide.

Claim 31 (Previously Presented): The film according to claim 30, wherein the polyphthalamide comprises from about 50 mole % to about 95 mole % hexamethylene terephthalamide units, from about 25 mole % to about 0 mole % hexamethylene isophthalamide units, and from about 50 mole % to about 5 mole % hexamethylene adipamide units.

Claim 32 (Previously Presented): The film according to claim 29, wherein the impact modifier is a rubber.

Claim 33 (Previously Presented): The film according to claim 32, wherein the rubber is a functionalized polyolefin-based rubber.

Claim 34 (Previously Presented): The film according to claim 33, wherein the functionalized polyolefin-based rubber is a maleic anhydride functionalized styrene-ethylene-butylene-styrene block copolymer or a maleic anhydride functionalized ethylene-propylene-diene monomer rubber.

Claim 35 (Previously Presented): The film according to claim 31, wherein the impact modifier is selected from the group consisting of a maleic anhydride functionalized ethylene-propylene-diene monomer rubber, a maleic anhydride functionalized styrene ethylene-butylene-styrene block copolymer, and mixtures thereof.

Claim 36 (Currently Amended): The film according to claim 29, wherein said layers are contiguous layers of the order  $[(L1)_n/(L2)_m]^x$  where x is any integer of 1 or greater, n is any integer of 1 or greater, and m is any integer of 1 or greater.

Claim 37 (Previously Presented): The film according to claim 29, wherein said layer L1 further comprises an external lubricant.

Claim 38 (Previously Presented): The film according to claim 29, wherein said layer L1 further comprises a heat stabilizer comprising at least one copper (I) salt and at least one alkali metal halide.

Claim 39 (Previously Presented): The film according to claim 29, wherein layer L1 further comprises an anti-oxidant.

Claim 40 (Currently Amended): A method for making a film comprising, as sole layers,

(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier, and, **optionally**,

(2) at least one layer L2 comprising an aliphatic polyamide, comprising extruding an aromatic polyamide and an impact modifier, and optionally extruding an aliphatic polyamide, into a film.

Claim 41 (Cancelled)

Claim 42 (Cancelled)

Claim 43 (Cancelled)

Claim 44 (Previously Presented): The film according to claim 29, comprising, as sole layers, at least one layer L1 and at least one layer L2.

Claim 45 (Previously Presented): The film according to claim 44, comprising, as sole layers, two layers, the first one being a L1 layer and the other one being a L2 layer.

Claim 46 (Previously Presented): The film according to claim 45, wherein L1 is the inner layer.

Claim 47 (Previously Presented): The film according to claim 45, wherein L1 is the outer layer.

Claim 48 (Previously Presented): The film according to claim 44, which comprises, as sole layers, three layers of L1/L2/L1, wherein L1 is both an inner and outer layer and L2 is the intermediate layer.

Claim 49 (New): The hollow body according to claim 29, wherein said aliphatic polyamide is selected from PA6, PA6,6, PA4,6, PA11, PA12, and PA6,12.

Claim 50 (New): The hollow body according to claim 49, wherein said impact modifier comprises maleic anhydride functionalized ethylene-propylene-diene monomer rubber and an ethylene-C<sub>3</sub>-C<sub>8</sub> alpha-olefin polymer.

Claim 51 (New): The hollow body according to claim 50, wherein L1 comprises an aromatic polyamide obtained by the polycondensation reaction between hexamethylenediamine and a terephthalic/isophthalic/adipic acid composition wherein the mole ratio of terephthalic/isophthalic/adipic acids in the acid composition is 50 to 80/ from 10 to 40/ not more than 25.

Claim 52 (New): The hollow body according to claim 50, wherein L1 comprises a polyphthalamide comprising from about 50 mole % to about 95 mole % hexamethylene terephthalamide units, from about 25 mole % to about 0 mole % hexamethylene isophthalamide units, and from about 50 mole % to about 5 mole % hexamethylene adipamide units.
